MOTION DESIGN STUDIO

UI, SaaS, typography, brand & 3D motion ideas

30 CATEGORIES | 600 IDEAS | 46 RESOURCES

A practical collection of motion briefs, from magnetic cursors and kinetic type to bento reveals, AI interfaces and cinematic product loops.

Original editorial ideas with primary technique references and inspiration links. Every entry includes an explanation and clickable source IDs. All 46 full resource URLs appear at the end.

Contents

30 categories. Each chapter contains 20 motion ideas.

01 **Text reveals** 001-020 03
02 **Kinetic typography** 021-040 04
03 **Scroll storytelling** 041-060 05
04 **Cursor & hover** 061-080 06
05 **Buttons & calls to action** 081-100 07
06 **Navigation & tabs** 101-120 08
07 **Bento & cards** 121-140 09
08 **Lists & grids** 141-160 10
09 **Page transitions** 161-180 11
10 **Onboarding** 181-200 12
11 **SaaS product demos** 201-220 13
12 **AI interfaces** 221-240 14
13 **Dashboards & data** 241-260 15
14 **Loading & progress** 261-280 16
15 **Notifications & feedback** 281-300 17
16 **Forms & inputs** 301-320 18
17 **Commerce & checkout** 321-340 19
18 **Mobile gestures** 341-360 20
19 **Animated icons** 361-380 21
20 **Logo & brand systems** 381-400 22
21 **3D product reveals** 401-420 23
22 **Material transformations** 421-440 24
23 **Particle systems** 441-460 25
24 **Shader & distortion** 461-480 26
25 **Gradients & light** 481-500 27
26 **Editorial collage** 501-520 28
27 **Social & launch loops** 521-540 29
28 **Transitions & cuts** 541-560 30
29 **Audio-reactive motion** 561-580 31
30 **Spatial camera moves** 581-600 32

Resources & references 33-38

Text reveals

001-020 / 20 motion ideas

001 **baseline-lift** [S01] [S03]
Lift each word through a tight baseline mask, then let punctuation arrive one beat late.

002 **ink-window** [S01] [S03]
Move a narrow reveal window across a headline while the letters stay perfectly still.

003 **center-break** [S01] [S03]
Reveal a title outward from its middle word with a soft, expanding gap.

004 **blur-to-baseline** [S01] [S03]
Resolve blurred letters as they rise into alignment, finishing with a crisp final word.

005 **letter-shutters** [S01] [S03]
Open a tiny vertical shutter inside each character cell in a left-to-right wave.

006 **outline-to-solid** [S17] [S02]
Trace hollow letterforms briefly, then fill them as the supporting caption appears.

007 **descending-caption** [S01] [S03]
Drop caption lines from above into separate masks with progressively shorter delays.

008 **diagonal-word-sweep** [S01] [S03]
Expose words along a diagonal edge that travels from the headline's first line to its last.

009 **punctuation-spark** [S01] [S03]
Reveal a sentence from its punctuation mark, sending the other characters outward into place.

010 **stacked-line-unfold** [S01] [S03]
Unfold headline lines like stacked paper strips until they form one flat block.

011 **glyph-focus** [S01] [S03]
Bring one anchor letter into focus first, then sharpen the surrounding word.

012 **highlight-pass** [S01] [S03]
Sweep a colored highlight over hidden type and leave readable letters in its wake.

013 **type-through-frame** [S01] [S03]
Slide oversized letters behind a small fixed frame until the complete title fits.

014 **syllable-steps** [S01] [S03]
Reveal a long product name in syllable-sized groups with stepped pauses.

015 **counter-cutout** [S17] [S03]
Grow circular masks from the counters of SVG letters until they expose the complete headline.

016 **vertical-title-draw** [S01] [S03]
Build a vertical title upward, using each arriving character as the next character's launch point.

017 **spaced-to-set** [S01] [S03]
Start with widely scattered letters and compress their spacing into a clean headline.

018 **ribbon-word-peel** [S01] [S03]
Peel a colored ribbon off a word, revealing the letters as its edge curls away.

019 **subtitle-echo** [S01] [S03]
Reveal the main title, then let a smaller subtitle echo the same timing half a beat later.

020 **last-letter-lock** [S01] [S03]
Slide the title into view with its final character overshooting before locking into alignment.

Kinetic typography

021-040 / 20 motion ideas

021 **elastic-keyword** [S02] [S03]
Stretch one keyword horizontally on a beat while the rest of the sentence holds its width.

022 **orbiting-caption** [S02] [S03]
Send a small caption around a circular headline, rotating it upright as it passes the front.

023 **word-piston** [S02] [S03]
Drive an oversized word up and down between two narrow caption rails.

024 **type-domino** [S02] [S03]
Tip letters into their neighbors, then let the final letter spring the whole word upright.

025 **accordion-sentence** [S02] [S03]
Compress and expand the spaces between words like an accordion opening to a rhythm.

026 **baseline-wave** [S02] [S03]
Carry a wave through a sentence while each character keeps its own upright orientation.

027 **weight-breath** [S02] [S03]
Pulse a variable font's weight slowly while its letter spacing compensates to hold the line.

028 **word-conveyor** [S02] [S03]
Loop a row of words through a fixed window and pause each new phrase at the center.

029 **rotating-word-slot** [S02] [S03]
Rotate a cuboid of alternate keywords inside a sentence without shifting the surrounding text.

030 **type-mirror-fold** [S02] [S03]
Fold a word toward its reflected copy until both briefly become one line.

031 **syllable-slam** [S02] [S03]
Land syllables on successive beats, with the word's shadow arriving a fraction later.

032 **letter-orbit-return** [S02] [S03]
Send letters around short elliptical paths before they regroup as a new headline.

033 **counter-pulse** [S17] [S02]
Scale inner SVG letter contours on the beat while their outer contours remain fixed.

034 **type-cascade-turn** [S02] [S03]
Rotate each line a few degrees in sequence, passing a tilt down the text stack.

035 **semantic-stretch** [S02] [S03]
Animate the word "wide" by widening it while neighboring words remain untouched.

036 **diagonal-type-loop** [S02] [S03]
Move a repeated phrase diagonally behind a stationary cutout of its first letter.

037 **sentence-gear** [S02] [S03]
Rotate rings of small words at different speeds around a fixed central statement.

038 **rubber-baseline** [S02] [S03]
Bend a baseline under a heavy keyword, then let lighter words rebound along it.

039 **split-word-shear** [S02] [S03]
Offset the top and bottom halves of a headline in opposite directions before realigning.

040 **type-zoom-punctuation** [S02] [S16]
Push through an enlarged punctuation mark and reveal the next sentence inside its opening.

Scroll storytelling

041-060 / 20 motion ideas

041 **pinned-chapter-stack** [S04] [S05]
Pin a chapter title while successive story cards climb underneath and replace its subtitle.

042 **product-explode-scroll** [S04] [S05]
Separate a product into labeled layers as the page advances, then reassemble it at the next section.

043 **reading-spotlight** [S04] [S05]
Move a bright band through a paragraph in sync with scroll progress to guide the reading pace.

044 **timeline-rail-fill** [S04] [S05]
Fill a vertical timeline rail while its milestones expand into short scene panels.

045 **map-route-unroll** [S04] [S05]
Draw a journey route across a map as nearby place labels rise into view.

046 **horizontal-story-track** [S04] [S05]
Translate a wide storyboard sideways while vertical scrolling controls each panel's arrival.

047 **feature-to-proof** [S04] [S05]
Shrink a feature claim into a corner label while a supporting chart grows into its former space.

048 **sticky-image-handoff** [S04] [S05]
Keep one image pinned as its annotations switch and its crop shifts between story chapters.

049 **scroll-depth-diorama** [S04] [S05]
Move foreground, middle and background layers at distinct rates inside a framed scene.

050 **chapter-aperture** [S04] [S05]
Open a circular aperture into the next chapter until it fills the entire story panel.

051 **metric-scale-journey** [S04] [S05]
Enlarge a small data point into a full chart as the page moves from claim to evidence.

052 **stepwise-device-demo** [S04] [S05]
Advance a device mockup through specific interface states at successive scroll milestones.

053 **caption-track-change** [S04] [S05]
Slide captions along a fixed rail while their matching visuals crossfade in a separate column.

054 **photo-to-wireframe** [S04] [S05]
Scrub a product image into a wireframe view as labels explain the hidden structure.

055 **branching-scroll-path** [S04] [S05]
Draw a main story line that splits into two side panels before merging at the conclusion.

056 **viewport-quote-lock** [S04] [S05]
Let a quote grow into the viewport, hold its key phrase, then release the remaining lines.

057 **scroll-slice-panorama** [S04] [S05]
Reveal a panorama through independently moving vertical slices that align at the section midpoint.

058 **index-to-chapter** [S04] [S05]
Expand a small chapter index tile into the chapter's full visual as it reaches the viewport center.

059 **scroll-before-after** [S04] [S05]
Scrub a divider across two aligned states so the comparison unfolds during the reader's descent.

060 **conclusion-foldback** [S04] [S05]
Fold earlier chapter thumbnails into a compact summary strip at the end of the story.

Cursor & hover

061-080 / 20 motion ideas

061 **magnetic-label** [S06] [S07]
Pull a link label gently toward the pointer while its underline stays attached to the original baseline.

062 **cursor-preview-card** [S06] [S07]
Attach a small image preview to the cursor when it crosses a project title.

063 **spotlight-card** [S06] [S07]
Move a soft highlight beneath a card's surface and let its border catch the same light.

064 **directional-hover-wipe** [S06] [S07]
Fill a tile from the edge the pointer enters and drain it toward the exit edge.

065 **cursor-word-lens** [S06] [S07]
Magnify only the letters beneath a moving circular lens while the headline remains in place.

066 **elastic-image-tilt** [S06] [S07]
Tilt an image toward the pointer and let its corner badge lag behind with a spring.

067 **hover-photo-fan** [S06] [S07]
Fan a small stack of photos outward when the pointer rests on the cover image.

068 **cursor-context-ring** [S06] [S07]
Morph a cursor ring into a short action label when it enters a playable or draggable area.

069 **ink-trail-decay** [S06] [S07]
Leave a short brushlike cursor trail that thins and fades instead of accumulating.

070 **hover-depth-planes** [S06] [S07]
Separate a card's icon, title and background into shallow depth layers under pointer movement.

071 **cursor-snap-outline** [S06] [S07]
Let a loose outline follow the cursor, then snap around the hovered control.

072 **hover-number-scan** [S06] [S07]
Sweep a thin scan line over a metric card and briefly enlarge the digit it crosses.

073 **image-edge-ripple** [S06] [S07]
Send one restrained ripple from the pointer's entry point across a still image.

074 **cursor-pixel-swarm** [S06] [S07]
Let a few nearby pixels gather around the cursor and settle back into their grid behind it.

075 **hover-caption-swap** [S06] [S07]
Replace a project's category caption with its short outcome while its title remains anchored.

076 **proximity-letter-lean** [S06] [S07]
Tilt nearby headline letters toward the cursor with influence fading by distance.

077 **hover-poster-crease** [S06] [S07]
Bend a poster along a diagonal crease whose angle follows the pointer.

078 **cursor-color-sampler** [S06] [S07]
Carry a small cursor swatch that adopts the color of each preview tile it enters.

079 **hover-orbit-controls** [S06] [S07]
Reveal two small action controls that arc around a card's top corner on hover.

080 **cursor-bridge-line** [S06] [S07]
Draw a fine line from the pointer to the center of the active image preview.

TECHNIQUE REFERENCES

[S06] Motion Cursor
[S07] Motion hover animation
[S08] Motion gesture animation

Full resource URLs: pp. 33-38.

Buttons & calls to action

081-100 / 20 motion ideas

081 **press-depth-shadow** [S08] [S07]
Compress a button and shorten its shadow on press, then restore both with a quick spring.

082 **arrow-runway** [S08] [S07]
Slide a button arrow down a short track while the label shifts just enough to make room.

083 **label-rollover** [S08] [S07]
Roll the button's label upward through a mask and bring a second copy in from below.

084 **border-lap** [S08] [S07]
Run a single bright segment around the button border when it receives focus.

085 **hold-to-confirm** [S08] [S07]
Fill a button from the pointer position while held, then turn the fill into a confirmation check.

086 **submit-to-progress** [S08] [S07]
Collapse the submit label into a dot and stretch that dot into a live progress line.

087 **success-stamp** [S08] [S07]
Replace a completed action label with a check that lands like a small rubber stamp.

088 **download-arrow-fold** [S08] [S07]
Fold a download arrow into a document icon once the file becomes ready.

089 **cta-door-open** [S08] [S07]
Part the button background at its center to reveal the destination label beneath.

090 **magnetic-cta-core** [S08] [S07]
Move a button's inner label toward the pointer while its outer hit area stays stable.

091 **button-liquid-fill** [S08] [S07]
Raise a gently curved fill inside a button as the pointer lingers over it.

092 **save-bookmark-draw** [S08] [S07]
Draw a bookmark outline inside the save button, then fill its folded corner.

093 **send-icon-windup** [S08] [S12]
Rotate a send icon backward on press, then launch it through an exit slot as the label changes.

094 **button-dual-action** [S09] [S08]
Split a wide CTA into two attached actions when the pointer pauses over its trailing chevron.

095 **cta-peel-corner** [S08] [S07]
Lift one button corner to expose a small supporting phrase beneath its surface.

096 **toggle-icon-trade** [S08] [S07]
Slide a button's icon out through one edge as the new action icon enters from the opposite edge.

097 **confirm-ring-close** [S08] [S07]
Close a thin ring around the confirmation icon only after the action finishes.

098 **button-counter-slot** [S08] [S07]
Roll the cart count to its next value while the add button gives one short compression.

099 **cta-split-reveal** [S08] [S07]
Move the label and arrow apart to reveal a compact shortcut hint between them.

100 **focus-rail-arrival** [S08] [S07]
Slide a focus rail into the button from the last focused control's direction.

TECHNIQUE REFERENCES

[S08] Motion gesture animation
[S07] Motion hover animation
[S09] Motion layout animation
[S12] Motion AnimatePresence

Full resource URLs: pp. 33-38.

Navigation & tabs

101-120 / 20 motion ideas

101 **shared-tab-underline** [S14] [S09]
Slide one underline between tabs while the selected label changes weight at the same pace.

102 **pill-nav-stretch** [S14] [S09]
Stretch a navigation pill toward the next item before its trailing edge catches up.

103 **menu-column-cascade** [S14] [S09]
Reveal a full-screen menu by columns, then stagger the links down each column.

104 **breadcrumb-forward-fold** [S14] [S09]
Fold the current breadcrumb into the trail as the next level expands beside it.

105 **icon-rail-expand** [S14] [S09]
Expand an icon-only sidebar into labeled rows while each icon keeps its original position.

106 **menu-image-assembly** [S14] [S09]
Gather scattered image fragments into the active menu item's full preview.

107 **hover-route-preview** [S14] [S09]
Slide a destination preview into a fixed panel as the pointer moves across navigation items.

108 **tab-content-handoff** [S14] [S09]
Move a tab's small thumbnail into the content panel as its text expands below.

109 **menu-trigger-to-index** [S09] [S12]
Expand the menu trigger's dot into a numbered section index as its label slides into the index header.

110 **nested-menu-depth** [S14] [S09]
Push a submenu forward from behind its parent row while the parent list recedes slightly.

111 **nav-progress-thread** [S14] [S09]
Draw a connecting thread through completed navigation steps and knot it at the active step.

112 **bottom-nav-bubble** [S14] [S09]
Raise the selected icon in a shallow bubble while adjacent labels slide aside.

113 **mega-menu-shelf** [S14] [S09]
Drop a wide menu panel like a shelf and let its feature cards settle onto it.

114 **section-index-orbit** [S14] [S09]
Rotate a compact section index so the active chapter always sits at the top.

115 **nav-dock-magnify** [S14] [S09]
Magnify the item nearest the pointer and distribute the remaining dock items smoothly around it.

116 **menu-curtain-part** [S14] [S09]
Open two narrow menu curtains from the center and reveal the navigation on the layer behind.

117 **tab-close-reflow** [S14] [S09]
Shrink a closing tab into its close icon while the neighboring tabs slide into the released space.

118 **route-label-shuffle** [S14] [S09]
Move the outgoing page label into the navigation rail as the next label grows into the header.

119 **mobile-menu-card-stack** [S14] [S09]
Spread compact navigation cards from a single menu tile and stack them again on close.

120 **menu-preview-slit** [S14] [S09]
Reveal a preview through a horizontal slit that follows the active link's vertical position.

TECHNIQUE REFERENCES

[S15] Codrops Image Tiles Menu Animation
[S12] Motion AnimatePresence

Full resource URLs: pp. 33-38.

Bento & cards

121-140 / 20 motion ideas

121 **bento-spotlight-expand** [S09] [S10]
Expand one selected bento tile while neighboring tiles compress into a supporting column.

122 **card-to-detail** [S09] [S10]
Grow a card into its detail panel while its title and image retain their visual positions.

123 **bento-row-domino** [S09] [S10]
Tilt a row of cards in sequence and return them flat as their content becomes visible.

124 **metric-card-countup** [S09] [S10]
Roll a metric to its new value while a tiny sparkline draws along the card's lower edge.

125 **card-backstage** [S09] [S10]
Lift a card's front layer to expose a short explanatory layer tucked underneath.

126 **bento-cross-reflow** [S09] [S10]
Move four tiles around a fixed central tile when the layout changes from square to wide.

127 **card-photo-pullout** [S09] [S10]
Pull a photo partly beyond its card boundary while the caption stays clipped inside.

128 **bento-light-tour** [S09] [S10]
Pass a soft highlight between bento cells to introduce the features in a clear sequence.

129 **card-slot-expand** [S09] [S10]
Open a thin horizontal slot inside a card and reveal secondary controls within it.

130 **bento-overlap-release** [S09] [S10]
Start with overlapping cards and slide each one into a distinct cell of the final grid.

131 **card-icon-construction** [S09] [S10]
Assemble a card's icon from two or three parts before revealing its description.

132 **card-pin-rotate** [S09] [S10]
Rotate a small note card around its pinned top corner as it changes between preview and detail.

133 **bento-image-bridge** [S09] [S10]
Move one continuous image across adjacent cells and align the fragments at the end.

134 **card-shadow-lift** [S09] [S10]
Raise a selected card while its shadow separates and neighboring cards settle lower.

135 **card-stack-browse** [S09] [S10]
Pull the next card from the back of a deck and slide the previous card beneath it.

136 **bento-chapter-switch** [S09] [S10]
Exchange a bento board's contents cell by cell while preserving the board's outer geometry.

137 **card-chart-unfurl** [S09] [S10]
Unroll a compact chart from the edge of a card as its summary label shifts upward.

138 **bento-corner-hinge** [S09] [S10]
Open a feature tile around its lower corner like a hinged panel.

139 **card-tag-orbit** [S09] [S10]
Bring small topic tags from behind a card into a short arc around its heading.

140 **bento-empty-to-full** [S09] [S10]
Let one compact tile split into the distinct content regions of a complete bento board.

TECHNIQUE REFERENCES

[S09] Motion layout animation
[S10] GSAP Flip
[S07] Motion hover animation

Full resource URLs: pp. 33-38.

Lists & grids

141-160 / 20 motion ideas

141 **row-insert-gap** [S13] [S09]
Open a gap between two list rows before sliding a newly added item into it.

142 **filter-grid-pack** [S13] [S09]
Shrink filtered items into their centers while the remaining tiles pack into the released space.

143 **row-merge-seam** [S09] [S12]
Draw two selected rows together, close their shared seam, and combine their tags into one ordered strip.

144 **sort-column-wave** [S13] [S09]
Reorder a table by one column and send a brief highlight wave down the new ranking.

145 **grid-center-bloom** [S13] [S09]
Reveal a grid outward from its center tile with distance-based delays.

146 **list-to-grid-fold** [S13] [S09]
Shorten list descriptions and move their thumbnails into a responsive card grid.

147 **grid-spotlight-row** [S13] [S09]
Widen the hovered row of tiles while adjacent rows compress within the same frame.

148 **row-priority-flag** [S09] [S12]
Unroll a narrow priority flag from a row's leading edge and slide the title right to accommodate it.

149 **selection-count-gather** [S13] [S09]
Move small selection dots from chosen rows into a compact count badge above the list.

150 **grid-zigzag-arrival** [S13] [S09]
Bring grid cells in along a zigzag reading path rather than a simple row-by-row cascade.

151 **row-complete-strike** [S13] [S09]
Draw a completion stroke across a task, then move the row into the completed group.

152 **group-collapse-stack** [S13] [S09]
Compress a list group into three overlapping preview rows beneath its heading.

153 **grid-snake-reorder** [S13] [S09]
Move tiles through a winding path when swapping between editorial and chronological order.

154 **list-search-narrow** [S13] [S09]
Let unmatched rows fade and collapse while matching terms brighten within the surviving rows.

155 **grid-column-split** [S13] [S09]
Split a wide gallery column into two narrow columns while each image preserves its center crop.

156 **row-live-update** [S13] [S09]
Slide a changed value into its table cell and briefly extend a small update marker from its edge.

157 **grid-page-handoff** [S13] [S09]
Move the last row of a grid into the first row's position as the next page of items arrives.

158 **pinned-row-dock** [S13] [S09]
Lift a pinned row out of the list and dock it beneath the list header.

159 **grid-density-shift** [S13] [S09]
Shrink thumbnails and reveal more columns while captions compress to a single line.

160 **list-branch-expand** [S13] [S09]
Grow child rows from a thin branch line below the selected parent item.

TECHNIQUE REFERENCES

[S13] Motion Reorder
[S09] Motion layout animation
[S11] Motion stagger
[S12] Motion AnimatePresence

Full resource URLs: pp. 33-38.

Page transitions

161-180 / 20 motion ideas

161 **shared-hero-route** [S12] [S10]
Expand a project thumbnail into the next page's hero while its title follows the same trajectory.

162 **vertical-curtain-route** [S12] [S10]
Close a single vertical curtain over the page and open it onto the destination.

163 **page-color-handoff** [S12] [S10]
Expand a destination card's background color until it becomes the next page's canvas.

164 **crosshair-aperture** [S12] [S10]
Open the next view through a small crosshair-shaped aperture at the clicked location.

165 **page-title-anchor** [S12] [S10]
Keep one title word fixed while the old page exits and the next page assembles around it.

166 **staggered-column-wipe** [S12] [S10]
Cover the outgoing view with offset columns, then uncover the incoming content in reverse order.

167 **thumbnail-tunnel** [S12] [S10]
Push through a clicked thumbnail until its image fills the frame and becomes the next scene.

168 **page-split-hinge** [S12] [S10]
Fold the current page into two panels that rotate away to reveal the destination beneath.

169 **route-card-deal** [S12] [S10]
Deal the next page into view like a large card while the previous page slides beneath it.

170 **text-to-page-window** [S12] [S10]
Enlarge a link's letterform until its counter becomes a window into the destination page.

171 **diagonal-page-peel** [S12] [S10]
Peel the outgoing page from one corner while a matching diagonal edge reveals the new view.

172 **content-river** [S12] [S10]
Send the outgoing content along a curved path and let the next content follow the same current.

173 **page-frame-collapse** [S12] [S10]
Collapse the page into its central image frame before expanding that frame into the next page.

174 **portal-button-route** [S12] [S10]
Grow the clicked button into a rounded portal and flatten its corners as the next view appears.

175 **route-image-slices** [S12] [S10]
Slice the selected image into bands that reposition to form the destination's image layout.

176 **footer-to-header** [S12] [S10]
Carry a footer chapter label upward and let it become the next page's header.

177 **page-depth-swap** [S12] [S10]
Move the current page backward in depth while the incoming page slides across its front.

178 **pixel-block-route** [S12] [S10]
Replace the page in large, ordered pixel blocks that resolve into the next view's composition.

179 **route-ink-spread** [S12] [S10]
Spread a solid mask from the clicked link and use its receding edge to reveal the destination.

180 **page-outline-build** [S12] [S10]
Trace the next page's main frame while the old content fades, then fill the traced regions.

Onboarding

181-200 / 20 motion ideas

181 **welcome-card-unpack** [S12] [S09]
Unpack a welcome card into the three controls the new user will learn first.

182 **step-dot-journey** [S12] [S09]
Move one active dot along the step rail and expand it into the next step's number.

183 **choice-preview-morph** [S12] [S09]
Morph a live preview between available setup choices as each option becomes selected.

184 **profile-avatar-build** [S12] [S09]
Assemble an avatar from the user's chosen color, shape and initials in successive layers.

185 **guided-spotlight-hop** [S12] [S09]
Move a soft spotlight between controls while its explanatory tooltip follows a short arc.

186 **setup-card-turn** [S12] [S09]
Turn the current setup card over to reveal the next step and preserve the card's outer position.

187 **preference-chip-gather** [S12] [S09]
Collect selected preference chips into a small summary cluster before the next step opens.

188 **onboarding-path-draw** [S12] [S09]
Draw a short route between completed setup stages and let the next stage grow from its endpoint.

189 **empty-state-demo** [S12] [S09]
Animate one sample item into an empty workspace and expand it to demonstrate the first useful action.

190 **first-task-rehearsal** [S12] [S09]
Play a brief ghosted drag gesture that shows where the first real item can be placed.

191 **invite-seat-fill** [S12] [S09]
Fill empty team seats with small avatar circles as invite fields are added.

192 **setup-progress-window** [S12] [S09]
Move a progress window across the step rail, revealing completed icons through its opening.

193 **tool-tip-from-target** [S12] [S09]
Expand a tiny marker on a control into the tooltip that explains that control.

194 **permission-context-reveal** [S12] [S09]
Slide a concrete feature preview beside a permission request to show what access enables.

195 **welcome-to-workspace** [S12] [S09]
Shrink the welcome illustration into the workspace corner as the actual tools slide into place.

196 **setup-summary-fold** [S12] [S09]
Fold completed step cards into a compact summary that can expand for edits.

197 **onboarding-branch-preview** [S12] [S09]
Reveal two short path previews from a choice card before the selected path expands.

198 **first-success-orbit** [S12] [S09]
Gather the first completed task's icon and label into a single, restrained success badge.

199 **shortcut-key-assembly** [S12] [S09]
Assemble a keyboard shortcut from separate keycaps as the matching command is demonstrated.

200 **launch-check-to-logo** [S12] [S09]
Transform the final setup check into the product mark, then dock it in the workspace header.

TECHNIQUE REFERENCES

[S11] Motion stagger

Full resource URLs: pp. 33-38.

SaaS product demos

201-220 / 20 motion ideas

201 **command-to-workspace** [S09] [S12] [S18]
Expand a typed command into a full workspace while its text becomes the page heading.

202 **cursor-handoff** [S09] [S12] [S18]
Pass one glowing cursor between three collaborators as each edits a different layer.

203 **empty-to-kanban** [S09] [S12] [S18]
Turn an empty-state illustration into columns, then deal task cards into the board.

204 **feature-spotlight-rail** [S09] [S12] [S18]
Slide a narrow spotlight across the interface and lift each featured control above the dimmed page.

205 **comment-thread-unfold** [S09] [S12] [S18]
Unfold one pinned comment into a threaded conversation that pushes the canvas aside.

206 **calendar-task-route** [S09] [S12] [S18]
Pull a task from a list along a curved path into a specific calendar slot.

207 **spreadsheet-to-chart** [S09] [S12] [S18]
Lift selected table cells into bars while the remaining grid fades into chart guides.

208 **integration-plugboard** [S09] [S12] [S18]
Draw cables from service tiles into a central app, lighting each route after connection.

209 **search-excerpt-flip** [S09] [S12] [S18]
Flip a search result's excerpt through three matched passages while the file title stays pinned.

210 **permission-ring-reveal** [S09] [S12] [S18]
Reveal a shared file's access levels as concentric rings around its avatar stack.

211 **version-time-scrub** [S09] [S12] [S18]
Scrub a document backward through revisions while changed blocks briefly retain color.

212 **bulk-action-sweep** [S09] [S12] [S18]
Sweep a selection band through rows and collect them into a floating action tray.

213 **sidebar-tool-detach** [S09] [S12] [S18]
Detach three tools from the sidebar and dock them beside the canvas object they control.

214 **automation-node-run** [S09] [S12] [S18]
Send a bright packet through an automation graph and open output cards at each branch.

215 **before-after-hinge** [S09] [S12] [S18]
Hinge a cluttered workflow into an organized view around one persistent central task.

216 **team-invite-orbit** [S09] [S12] [S18]
Orbit invitee avatars around a project tile, then dock them into its member row.

217 **report-export-fold** [S09] [S12] [S18]
Fold dashboard sections into a report cover that slides into an export destination.

218 **multiview-task-anchor** [S09] [S12] [S18]
Keep one task fixed while its surrounding layout changes from board to list to timeline.

219 **shortcut-key-conveyor** [S09] [S12] [S18]
Move keycaps under the cursor as repeated shortcuts accelerate a visible editing task.

220 **workspace-isometric-rise** [S09] [S12] [S18]
Raise a flat app screen into staggered isometric layers to explain its tool hierarchy.

AI interfaces

221-240 / 20 motion ideas

221 **prompt-token-ribbon** [S18] [S09] [S21]
Break a submitted prompt into a ribbon of word tiles that feeds a compact response panel.

222 **answer-block-assembly** [S18] [S09] [S21]
Reveal a generated answer as distinct text, chart, and source blocks that assemble in place.

223 **citation-return-path** [S18] [S09] [S21]
Draw a thin return path from an answer sentence to the source card it cites.

224 **agent-tool-relay** [S18] [S09] [S21]
Hand a luminous baton between search, code, and document tool cards before showing their outputs.

225 **voice-orb-transcript** [S18] [S09] [S21]
Flatten a listening orb into a transcript strip as spoken words settle into readable lines.

226 **context-file-intake** [S18] [S09] [S21]
Stack dropped file chips beside the prompt, then fan out their extracted preview snippets.

227 **model-switch-reframe** [S18] [S09] [S21]
Slide model option cards through a lens that reframes the response preview.

228 **image-variation-fan** [S18] [S09] [S21]
Fan generated image variations from one prompt tile, then enlarge the selected composition.

229 **edit-selection-weave** [S18] [S09] [S21]
Weave replacement text through a selected paragraph while untouched lines stay anchored.

230 **branching-chat-map** [S18] [S09] [S21]
Pull alternate replies into a branching map and follow one branch back to the chat.

231 **agent-status-lantern** [S18] [S09] [S21]
Change a small status lantern from listening ripples to working beats to a steady completion glow.

232 **source-cluster-magnet** [S18] [S09] [S21]
Magnetize related source chips into labeled clusters before the answer appears.

233 **prompt-history-stack** [S18] [S09] [S21]
Compress previous prompts into a layered stack that fans open when the user scrubs backward.

234 **multimodal-input-morph** [S18] [S09] [S21]
Morph the input tray between text, waveform, image crop, and attached document states.

235 **generated-table-growth** [S18] [S09] [S21]
Grow column dividers first, then place generated cells row by row into the stable grid.

236 **human-approval-gate** [S18] [S09] [S21]
Pause a moving action card at an approval gate, then let it pass after a clear press.

237 **canvas-inpaint-window** [S18] [S09] [S21]
Sweep a generation window across a masked image region while the surrounding canvas holds still.

238 **response-comparison-lift** [S18] [S09] [S21]
Lift two alternative outputs onto equal cards and move the chosen one into the editor.

239 **memory-chip-shelf** [S18] [S09] [S21]
Slide a confirmed preference into a small memory shelf with a reversible placement animation.

240 **agent-output-constellation** [S18] [S09] [S21]
Connect completed text, image, and chart outputs around the original request as a compact constellation.

TECHNIQUE REFERENCES

Full resource URLs: pp. 33-38.

Dashboards & data

241-260 / 20 motion ideas

241 **axis-first-chart** [S21] [S17] [S09]
Draw chart axes, raise the data marks, then reveal labels beside their final positions.

242 **kpi-digit-carry** [S21] [S17] [S09]
Roll a KPI counter with visible digit carry and a small pulse around the updated unit.

243 **filter-bar-redistribute** [S21] [S17] [S09]
Redistribute existing bars to filtered values while their category labels remain fixed.

244 **donut-segment-explode** [S21] [S17] [S09]
Ease one donut segment outward and connect it to a detailed value card.

245 **heatmap-wave-fill** [S21] [S17] [S09]
Fill a calendar heatmap in chronological waves before highlighting the selected date range.

246 **table-row-to-detail** [S21] [S17] [S09]
Stretch a selected table row into a detail panel while preserving its leading identifier.

247 **range-brush-lens** [S21] [S17] [S09]
Drag a translucent range brush and magnify the selected chart interval below.

248 **live-line-head** [S21] [S17] [S09]
Advance a line chart with a bright moving head while older segments settle to a muted stroke.

249 **bubble-cluster-sort** [S21] [S17] [S09]
Repack data bubbles into named clusters with labels that emerge in the cleared gaps.

250 **rank-change-lanes** [S21] [S17] [S09]
Move ranked rows through separate lanes so overtaking items remain readable.

251 **funnel-stage-pour** [S21] [S17] [S09]
Pour a particle stream through funnel stages, narrowing the stream to match each value.

252 **metric-card-drilldown** [S21] [S17] [S09]
Expand one metric tile into its underlying time series with the total pinned to the corner.

253 **timeline-event-flag** [S21] [S17] [S09]
Raise an event flag from a timeline and unfold its annotation without shifting the axis.

254 **treemap-subdivide** [S21] [S17] [S09]
Divide a single rectangle into proportional tiles and reveal labels from largest to smallest.

255 **geo-route-pulse** [S21] [S17] [S09]
Trace data routes between map nodes and pulse destination totals when each route arrives.

256 **cohort-diagonal-reveal** [S21] [S17] [S09]
Reveal a cohort matrix along diagonals so each elapsed period becomes visible in sequence.

257 **forecast-dotted-horizon** [S21] [S17] [S09]
Extend historical data into a dotted forecast and unfold a translucent uncertainty band.

258 **threshold-crossing-flash** [S21] [S17] [S09]
Change a chart marker's shape as it crosses a visible threshold, then open its alert card.

259 **small-multiples-sync** [S21] [S17] [S09]
Draw a grid of miniature charts on a shared playhead so their timing can be compared.

260 **scatter-to-quadrants** [S21] [S17] [S09]
Slide quadrant dividers into a scatterplot, then group point labels beside each region.

[S09] Motion layout animation

Full resource URLs: pp. 33-38.

Loading & progress

261-280 / 20 motion ideas

261 **skeleton-to-content** [S20] [S18] [S21]
Resolve skeleton blocks into matching content from top to bottom without changing their geometry.

262 **segmented-upload-track** [S20] [S18] [S21]
Fill an upload track in file-sized segments, each becoming a completed thumbnail.

263 **orbit-to-check** [S20] [S18] [S21]
Tighten an orbiting dot into a short arc that draws the final completion check.

264 **liquid-progress-vessel** [S20] [S18] [S21]
Raise a liquid level inside a bounded vessel while the percentage stays attached to its surface.

265 **pipeline-step-transfer** [S20] [S18] [S21]
Pass a glowing payload through labeled stages, leaving a settled marker after each transfer.

266 **download-ring-unspool** [S20] [S18] [S21]
Unspool a circular download ring into a horizontal file strip when the transfer completes.

267 **image-scan-decode** [S20] [S18] [S21]
Sweep a narrow decode band across a blurred image to reveal progressively sharper tiles.

268 **parallel-job-lanes** [S20] [S18] [S21]
Run separate progress capsules along parallel lanes, then merge finished jobs into one output.

269 **buffer-ahead-ribbon** [S20] [S18] [S21]
Show played and buffered portions as layered ribbons that advance at different speeds.

270 **sync-pair-exchange** [S20] [S18] [S21]
Exchange small blocks between two device icons until their interior grids match.

271 **queued-card-elevator** [S20] [S18] [S21]
Lift the active job from a waiting stack into a progress window while the queue closes below.

272 **checksum-tile-lock** [S20] [S18] [S21]
Lock small file tiles into a completed grid, then seal the grid with a single outline.

273 **document-page-render** [S20] [S18] [S21]
Reveal document pages as clean sheets while a render cursor travels down the page stack.

274 **progress-label-chase** [S20] [S18] [S21]
Let the progress label follow the bar end, then dock it above the finish marker.

275 **indeterminate-braid** [S20] [S18] [S21]
Braid two moving strokes into a calm loop until a real progress value separates them into a bar.

276 **connection-rings-align** [S20] [S18] [S21]
Rotate offset connection rings into alignment, then hold them as a stable linked symbol.

277 **paused-progress-clamp** [S20] [S18] [S21]
Clamp a moving progress band between two pause bars and release it from the same position.

278 **retry-arc-rewind** [S20] [S18] [S21]
Rewind a failed loader arc to its start and relaunch it with a visibly distinct second pass.

279 **batch-completion-cascade** [S20] [S18] [S21]
Collapse completed file progress rows into a compact stack of labeled success chips.

280 **ready-button-emerge** [S20] [S18] [S21]
Transform a completed progress capsule into the action button for opening the finished result.

TECHNIQUE REFERENCES

[S20] Motion - Transitions
[S18] Motion - React animation
[S21] Rive - Data Binding Overview

Full resource URLs: pp. 33-38.

Notifications & feedback

281-300 / 20 motion ideas

281 **toast-corner-stack** [S12] [S22] [S23]
Slide new toasts into a corner stack and compress older cards with a small depth offset.

282 **undo-return-thread** [S12] [S22] [S23]
Send a deleted item's ghost toward an undo toast, then pull it back along the same thread.

283 **inbox-badge-mitosis** [S12] [S22] [S23]
Split an inbox badge into message dots that travel into the newly opened message list.

284 **success-ticket-punch** [S12] [S22] [S23]
Punch a small circular notch into a completed card and drop the cutout into a confirmation badge.

285 **error-pinpoint-hop** [S12] [S22] [S23]
Hop a small error marker from the submit button to the field that needs correction.

286 **offline-banner-dock** [S12] [S22] [S23]
Dock an offline banner beneath navigation and route queued action chips into its tray.

287 **reconnected-burst-line** [S12] [S22] [S23]
Reconnect two broken line ends and sweep a brief confirmation pulse across the restored link.

288 **mention-avatar-popout** [S12] [S22] [S23]
Lift the mentioning avatar from a message preview and attach it to a compact notification card.

289 **upload-toast-thumbnail** [S12] [S22] [S23]
Replace a toast's progress symbol with the completed file thumbnail at the same anchor point.

290 **copy-stamp-feedback** [S12] [S22] [S23]
Stamp a tiny duplicate sheet onto the copied element before shrinking it into a check.

291 **permission-request-shield** [S12] [S22] [S23]
Open a shield-shaped panel from a permission icon and reveal the requested access line by line.

292 **warning-foldout-tab** [S12] [S22] [S23]
Unfold an amber tab from a panel edge to reveal a warning without covering its title.

293 **notification-group-bloom** [S12] [S22] [S23]
Bloom a grouped alert into individual cards arranged along a short vertical fan.

294 **muted-bell-zip** [S12] [S22] [S23]
Zip a diagonal line across a bell and tuck the notification count behind the muted icon.

295 **reaction-trail-bubble** [S12] [S22] [S23]
Send a reaction glyph from its picker to a message, leaving a short curved trail.

296 **achievement-ticket-tear** [S12] [S22] [S23]
Pull an earned achievement ticket from a narrow slot and detach it along a dotted edge.

297 **saved-state-bookmark** [S12] [S22] [S23]
Fold a bookmark corner into the edited document and release a short saved-state label.

298 **expiring-action-drain** [S12] [S22] [S23]
Drain a thin timer rail beneath a temporary action before the toast closes smoothly.

299 **conflict-two-paths** [S12] [S22] [S23]
Separate conflicting edit markers into two preview cards joined by a neutral merge connector.

300 **ambient-status-beacon** [S12] [S22] [S23]
Let a small status beacon swell once on a meaningful update, then return to a steady dot.

[S23] Rive - Events Overview

Full resource URLs: pp. 33-38.

Forms & inputs

301-320 / 20 motion ideas

301 **floating-label-notch** [S08] [S09] [S22]
Lift a field label into a cutout in the border as the first character appears.

302 **password-criteria-dock** [S08] [S09] [S22]
Dock password criteria beside the field and replace each unmet marker as its rule is satisfied.

303 **segmented-otp-travel** [S08] [S09] [S22]
Move a soft focus capsule across OTP cells while completed digits settle behind it.

304 **slider-number-tether** [S08] [S09] [S22]
Tether a numeric bubble to the slider thumb and relax the tether when dragging stops.

305 **select-menu-origin** [S08] [S09] [S22]
Open a select menu from the active value's position, keeping that row aligned through the expansion.

306 **chip-input-reflow** [S08] [S09] [S22]
Turn confirmed text into a chip and slide the caret into the space left by the wrapping row.

307 **date-range-bridge** [S08] [S09] [S22]
Draw a soft bridge between selected calendar dates, rounding only the two outer endpoints.

308 **stepper-rail-fill** [S08] [S09] [S22]
Advance a form step along a connecting rail as the current panel folds into the next.

309 **radio-dot-transfer** [S08] [S09] [S22]
Transfer a filled dot between radio options using a short curved path inside the group.

310 **checkbox-drawn-tick** [S08] [S09] [S22]
Draw a check from a compressed box corner, then release the box to its resting shape.

311 **toggle-knob-flip** [S08] [S09] [S22]
Flip the toggle thumb like a coin as its two engraved state symbols exchange sides.

312 **search-focus-aperture** [S08] [S09] [S22]
Widen the search field from its icon and dim nearby controls to establish a clear input zone.

313 **textarea-growing-baseline** [S08] [S09] [S22]
Grow a text area one line at a time while its lower controls slide with the baseline.

314 **file-drop-corner-fold** [S08] [S09] [S22]
Fold the drop zone corners inward around an accepted file, then reveal its metadata below.

315 **autocomplete-word-bridge** [S08] [S09] [S22]
Extend a faint completion from the caret and solidify the text when the suggestion is accepted.

316 **validation-line-route** [S08] [S09] [S22]
Route a colored underline from the edited field toward its nearby validation message.

317 **range-knob-collision** [S08] [S09] [S22]
Let paired range knobs gently resist overlap while the selected band compresses between them.

318 **currency-unit-slide** [S08] [S09] [S22]
Slide a currency symbol into a fixed prefix slot while the entered amount keeps its alignment.

319 **form-summary-gather** [S08] [S09] [S22]
Gather completed field labels into a compact summary card before the final confirmation.

320 **signature-ink-settle** [S08] [S09] [S22]
Follow a signature stroke with a subtle wet edge that settles into an even line.

TECHNIQUE REFERENCES

[S08] Motion gesture animation
[S09] Motion layout animation
[S22] Rive - State Machine Overview

Full resource URLs: pp. 33-38.

Commerce & checkout

321-340 / 20 motion ideas

321 **product-to-cart-arc** [S09] [S08] [S12]
Send a product cutout along a curved path into the cart and increment its badge on arrival.

322 **variant-swatch-wipe** [S09] [S08] [S12]
Wipe a selected color across the product surface from the tapped swatch's direction.

323 **size-card-measure** [S09] [S08] [S12]
Extend a measuring bracket from the chosen size chip to a product dimension preview.

324 **cart-row-collapse** [S09] [S08] [S12]
Fold a removed cart row into its thumbnail before neighboring items close the gap.

325 **quantity-total-carry** [S09] [S08] [S12]
Step the quantity counter and roll only the total's digits that actually change.

326 **checkout-step-envelope** [S09] [S08] [S12]
Fold a completed checkout section into a labeled envelope as the next section opens below.

327 **delivery-route-preview** [S09] [S08] [S12]
Trace the selected delivery option across a simple route and dock its arrival label at the endpoint.

328 **coupon-ticket-insert** [S09] [S08] [S12]
Insert a coupon ticket into the order summary and slide the discount line into the price stack.

329 **payment-card-slot** [S09] [S08] [S12]
Slide a chosen payment card into a secure slot, leaving its last four digits visible.

330 **order-confirmation-receipt** [S09] [S08] [S12]
Unroll the confirmed order as a receipt whose top edge stays connected to the success mark.

331 **bundle-magnetic-set** [S09] [S08] [S12]
Pull selected products into a bounded bundle and reveal the combined price beneath the group.

332 **wishlist-heart-pocket** [S09] [S08] [S12]
Fold a heart into a small pocket on the product tile and store its miniature thumbnail inside.

333 **compare-column-anchor** [S09] [S08] [S12]
Expand selected product tiles into comparison columns with their images anchored at the top.

334 **gallery-detail-loupe** [S09] [S08] [S12]
Open a circular detail loupe over the product image and glide it between two material close-ups.

335 **shipping-threshold-fill** [S09] [S08] [S12]
Fill a shipping threshold rail with the current basket amount and reveal the remaining amount beside it.

336 **subscription-plan-elevator** [S09] [S08] [S12]
Raise the selected plan while its included features slide into a shared detail area.

337 **price-period-flip** [S09] [S08] [S12]
Flip the billing-period label and smoothly update the associated price and savings line.

338 **return-label-peel** [S09] [S08] [S12]
Peel a return label from an order card and place it onto a simple parcel outline.

339 **pickup-location-pin** [S09] [S08] [S12]
Drop the chosen pickup pin onto the map and grow its address card from the pin stem.

340 **stock-choice-reveal** [S09] [S08] [S12]
Expand an availability chip into a store-by-store list with each quantity aligned to its location.

Mobile gestures

341-360 / 20 motion ideas

341 **swipe-action-curtain** [S19] [S13] [S08]
Drag a message row aside to reveal action buttons that widen proportionally with the gesture.

342 **pull-refresh-stem** [S19] [S13] [S08]
Stretch a small stem from the top edge, then curl it into a refresh loop after release.

343 **bottom-sheet-detents** [S19] [S13] [S08]
Move a bottom sheet between three snap positions while its handle compresses at each stop.

344 **card-deck-flick** [S19] [S13] [S08]
Flick the top card from a deck with rotation driven by the touch point's horizontal offset.

345 **pinch-gallery-anchor** [S19] [S13] [S08]
Zoom a photo around the midpoint between two touches while nearby gallery tiles recede.

346 **long-press-lift** [S19] [S13] [S08]
Lift a pressed tile with a growing shadow and reveal a context menu attached to its nearest edge.

347 **drag-handle-row-swap** [S19] [S13] [S08]
Lift a list row by its handle and make neighboring rows open a precise landing gap.

348 **edge-back-page-curl** [S19] [S13] [S08]
Pull the current page from the left edge and expose the previous page beneath a shallow curl.

349 **tab-swipe-indicator** [S19] [S13] [S08]
Track a swipe with the tab indicator as the two adjacent page titles crossfade.

350 **rubber-band-boundary** [S19] [S13] [S08]
Stretch content slightly beyond its scroll boundary and rebound it with a short damped motion.

351 **thumb-zone-menu-fan** [S19] [S13] [S08]
Fan primary actions upward from a floating button along an arc reachable by the thumb.

352 **map-pin-drag-shadow** [S19] [S13] [S08]
Lift a map pin above its ground shadow during dragging and reunite both at the drop point.

353 **media-scrub-loupe** [S19] [S13] [S08]
Raise a magnified timeline preview above the finger while a fine playhead follows below.

354 **swipe-dismiss-capsule** [S19] [S13] [S08]
Drag a notification capsule toward the nearest edge while its rounded corners tighten.

355 **stack-to-spread-pinch** [S19] [S13] [S08]
Spread a photo stack into a contact sheet as a pinch opens around its center.

356 **gesture-lock-notch** [S19] [S13] [S08]
Slide a recording control into a notch to hold recording, then show a stable lock indicator.

357 **carousel-depth-parallax** [S19] [S13] [S08]
Move front product cards faster than the soft background plane during a carousel swipe.

358 **scroll-header-compress** [S19] [S13] [S08]
Compress a large page title into a compact header as its baseline reaches the navigation bar.

359 **floating-panel-toss** [S19] [S13] [S08]
Toss a small utility panel toward a screen corner and let it settle into a compact dock.

360 **two-finger-range-brush** [S19] [S13] [S08]
Use two touch points to stretch a selected timeline interval while its midpoint label stays centered.

Animated icons

361-380 / 20 motion ideas

361 **search-target-lock** [S17] [S22] [S21]
Sweep a magnifier over three tiny marks and snap its lens into a centered target ring.

362 **menu-to-close-knot** [S17] [S22] [S21]
Weave three menu strokes into two crossing close strokes around a shared center.

363 **play-pause-stroke-split** [S17] [S22] [S21]
Split a triangular play outline into two straight pause bars with matched stroke weight.

364 **bell-clapper-lag** [S17] [S22] [S21]
Swing a notification bell with its clapper following a few frames behind the shell.

365 **folder-tab-open** [S17] [S22] [S21]
Lift a folder's front flap and reveal a single document rising from the interior.

366 **cloud-upload-stem** [S17] [S22] [S21]
Grow an upload arrow from a cloud's center, then retract it after a brief completion pulse.

367 **eye-blink-privacy** [S17] [S22] [S21]
Close an eye icon into a line and cross it with a short privacy slash.

368 **location-pin-ripple** [S17] [S22] [S21]
Drop a location pin onto its point and send one soft ring across the ground.

369 **link-chain-catch** [S17] [S22] [S21]
Rotate two broken chain links until their openings catch and close.

370 **sparkle-four-arm-draw** [S17] [S22] [S21]
Draw a four-point sparkle from its center and let the arms settle at unequal speeds.

371 **bookmark-tail-fold** [S17] [S22] [S21]
Fold a bookmark's lower corners into its notched tail as the save state activates.

372 **volume-wave-build** [S17] [S22] [S21]
Build sound waves outward from a speaker as the volume value increases.

373 **battery-cell-charge** [S17] [S22] [S21]
Illuminate battery cells one at a time and let the terminal pulse only while charging.

374 **settings-gear-to-sliders** [S17] [S22] [S21]
Unroll a gear's teeth into three slider tracks with staggered knob positions.

375 **calendar-page-turn** [S17] [S22] [S21]
Turn a calendar page around its top rings to reveal the newly selected date.

376 **trash-lid-catch** [S17] [S22] [S21]
Lift a bin lid as a small file drops inside, then close the lid with a controlled rebound.

377 **compass-needle-seek** [S17] [S22] [S21]
Let a compass needle overshoot its bearing once before resting on the chosen direction.

378 **share-arrow-branch** [S17] [S22] [S21]
Split a share arrow into three short routes ending in evenly spaced destination dots.

379 **lock-shackle-seat** [S17] [S22] [S21]
Rotate an open shackle into its socket and flash a thin seam around the closed lock.

380 **download-tray-receive** [S17] [S22] [S21]
Lower a download arrow into a tray and flatten its stem into a completed file line.

Logo & brand systems

381-400 / 20 motion ideas

381 **monogram-line-join** [S24] [S25] [S17]
Draw separate monogram strokes from opposite edges and join them at one emphasized intersection.

382 **wordmark-width-breathe** [S24] [S25] [S17]
Expand selected wordmark letters in width while preserving their baseline and surrounding spacing.

383 **symbol-grid-assembly** [S24] [S25] [S17]
Slide a small set of geometric modules from a grid into a recognizable brand symbol.

384 **logo-counter-window** [S24] [S25] [S17]
Use the logo's counters as windows onto moving color fields before resolving to a solid mark.

385 **brand-ribbon-knot** [S24] [S25] [S17]
Thread a flat brand ribbon through a simple loop and tighten it into the final symbol.

386 **logo-negative-cut** [S24] [S25] [S17]
Reveal a mark by moving colored blocks apart to expose its silhouette in negative space.

387 **brand-keyline-echo** [S24] [S25] [S17]
Send three offset keylines around the symbol and align them into a single master outline.

388 **responsive-logo-collapse** [S24] [S25] [S17]
Compress the full brand lockup into a compact symbol while its defining stroke stays visible.

389 **brand-frame-exchange** [S24] [S25] [S17]
Exchange the logo's bounding frame with a photograph frame to carry the identity into content.

390 **sonic-mark-bars** [S24] [S25] [S17]
Build the logo from abstract sound bars that settle into a precise final silhouette.

391 **monogram-folded-plane** [S24] [S25] [S17]
Fold a single flat plane into a monogram using two clear hinge moves and one final flattening.

392 **brand-dots-converge** [S24] [S25] [S17]
Converge a controlled field of brand-colored dots into the mark, retaining a few spaced accents.

393 **logo-registration-slide** [S24] [S25] [S17]
Slide two color separations past one another until their overlap produces the final brand mark.

394 **variable-weight-wave** [S24] [S25] [S17]
Pass a wave of changing type weight through the wordmark, ending on its approved resting form.

395 **brand-pattern-crop** [S24] [S25] [S17]
Move a repeating brand motif through a tight crop that opens to reveal the originating symbol.

396 **emblem-ring-orbit** [S24] [S25] [S17]
Orbit small identity elements around an emblem and dock them into its surrounding ring.

397 **letter-to-layout-block** [S24] [S25] [S17]
Expand one logo letter into a modular content block that frames a headline or image.

398 **brand-gradient-drift** [S24] [S25] [S17]
Move a restrained gradient through a stationary mark, then dissolve it into the surrounding palette.

399 **seal-imprint-reveal** [S24] [S25] [S17]
Press a circular brand seal into a flat surface and reveal its detail as the light sweeps over it.

400 **logo-outro-thread** [S24] [S25] [S17]
Pull a thin brand-colored thread through the final scene until it resolves into the centered logo.

3D product reveals

401-420 / 20 motion ideas

401 **iris-shell-reveal** [S26] [S29] [S31]
Open six shell segments like an iris while a matte device rises through the center.

402 **magnet-corner-dock** [S26] [S29] [S31]
Pull four accessories into a hovering device, then lock them flush on the final beat.

403 **hinge-ribbon-open** [S26] [S29] [S31]
Unfold a metallic ribbon into a product stand and rotate the hero item upright.

404 **edge-tracer-arrival** [S26] [S29] [S31]
Trace a black product with a thin moving rim light before revealing its full surface.

405 **exploded-layer-sandwich** [S26] [S29] [S31]
Separate a device into thin floating layers, orbit halfway, then compress them into one.

406 **condensation-orbit** [S26] [S29] [S31]
Track a cold bottle as droplets merge and a clear stripe exposes its printed label.

407 **vacuum-wrap-peel** [S26] [S29] [S31]
Stretch translucent film over a product, then peel it away in one elastic diagonal pull.

408 **stacked-lens-assembly** [S26] [S29] [S31]
Slide optical discs along one axis until they form a complete camera lens.

409 **pedestal-piston-lift** [S26] [S29] [S31]
Raise a product through nested cylindrical plinths that descend as it clears each rim.

410 **floating-ring-align** [S26] [S29] [S31]
Spin loose rings around a watch until each ring aligns with a different case detail.

411 **fluid-surface-break** [S26] [S29] [S31]
Push a product through a reflective liquid sheet that drains from its bevels.

412 **silhouette-scan-volume** [S26] [S29] [S31]
Sweep a thin scan plane through darkness to build a product silhouette slice by slice.

413 **miniature-world-flip** [S26] [S29] [S31]
Rotate a tiny landscape on a product screen until the screen becomes the whole scene.

414 **cable-zip-reveal** [S26] [S29] [S31]
Route a glowing cable around a hidden object, then tighten it into the product outline.

415 **ripple-plinth-landing** [S26] [S29] [S31]
Land a product on a soft plinth and send broad concentric dents across the platform.

416 **sticker-tab-unmask** [S26] [S29] [S31]
Pull a bright corner tab to unwrap a patterned outer layer from a neutral product.

417 **tile-product-mosaic** [S26] [S29] [S31]
Rotate a wall of shallow tiles until their surfaces assemble one sharp product image.

418 **macro-knurl-journey** [S26] [S29] [S31]
Travel along enlarged knurling, then pull back to reveal it as a small control dial.

419 **manual-fold-stage** [S26] [S29] [S31]
Unfold an instruction sheet into a paper stage that presents the product at its center.

420 **shadow-first-entry** [S26] [S29] [S31]
Move an oversized product shadow across the floor before the actual object enters frame.

Full resource URLs: pp. 33-38.

Material transformations

421-440 / 20 motion ideas

421 **ceramic-craze-bloom** [S30] [S26] [S31]
Grow fine cracks across glossy ceramic, then fill each crack with a warm luminous glaze.

422 **chrome-to-knit** [S30] [S26] [S31]
Unweave a polished chrome sphere into thick yarn loops while preserving its silhouette.

423 **wax-thread-extrusion** [S30] [S26] [S31]
Extrude soft wax through a narrow slit and coil the emerging ribbon into a monogram.

424 **paper-pulp-reform** [S30] [S26] [S31]
Dissolve a paper object into wet fibers that settle into a new embossed sheet.

425 **rubber-cell-inflate** [S30] [S26] [S31]
Inflate a flat rubber lattice cell by cell until it forms a soft sculptural cushion.

426 **sand-glass-ribbon** [S30] [S26] [S31]
Send a white-hot front through a sand ribbon, leaving smooth transparent glass behind.

427 **clay-thumbwave** [S30] [S26] [S31]
Animate a line of thumb dents across a clay block before smoothing it back into a cube.

428 **frost-clear-window** [S30] [S26] [S31]
Clear frost from the center of a glass slab while icy crystals retreat toward its edges.

429 **velvet-metal-comb** [S30] [S26] [S31]
Comb velvet fibers in one direction until their tips merge into a brushed metal surface.

430 **foil-crumple-unfold** [S30] [S26] [S31]
Crumple reflective foil into a tight ball, then unfold it into a nearly flat color field.

431 **liquid-marble-core** [S30] [S26] [S31]
Cut through a stone sphere to reveal slow liquid veins flowing beneath its solid shell.

432 **tar-ink-bloom** [S30] [S26] [S31]
Stretch a thick black droplet into a thin puddle that blooms into translucent ink clouds.

433 **wood-ring-melt** [S30] [S26] [S31]
Rotate concentric wood rings as their grain softens into a flowing caramel spiral.

434 **gel-cutaway-stack** [S30] [S26] [S31]
Slice colored gel into hovering slabs and slide them apart to expose internal bubbles.

435 **porcelain-skin-shed** [S30] [S26] [S31]
Peel a thin porcelain shell from a soft object to reveal a saturated rubber core.

436 **mesh-fabric-solidify** [S30] [S26] [S31]
Pull a loose textile mesh taut until its gaps close into an opaque sculpted surface.

437 **soap-film-prism** [S30] [S26] [S31]
Inflate a soap membrane through a wire frame while iridescent bands travel over its skin.

438 **cork-granule-pack** [S30] [S26] [S31]
Gather cork granules into a mold and compress them into a clean rounded volume.

439 **chalk-lacquer-wipe** [S30] [S26] [S31]
Sweep a glossy liquid edge over dry chalk, sealing the grain into a saturated lacquer.

440 **basalt-lava-veins** [S30] [S26] [S31]
Cool a glowing liquid block into black basalt while bright seams close from the edges.

TECHNIQUE REFERENCES

[S30] Spline: Creating Material Layers
[S26] Three.js physical material transmission example
[S31] Blender Manual: Geometry Nodes

Full resource URLs: pp. 33-38.

Particle systems

441-460 / 20 motion ideas

441 **vortex-keyhole** [S32] [S28] [S31]
Funnel glowing dust through a keyhole, then fan it into a broad luminous plane.

442 **magnetic-filings-mark** [S32] [S28] [S31]
Use an invisible moving field to pull metal filings into a crisp brand silhouette.

443 **seed-rain-sculpture** [S32] [S28] [S31]
Drop tiny seeds onto a suspended surface and let them grow into a dense organic form.

444 **charged-dust-bridge** [S32] [S28] [S31]
Stretch two dust clouds toward each other until sparks connect them into a floating bridge.

445 **orbiting-bead-torus** [S32] [S28] [S31]
Release colored beads along tilted orbits that gradually settle into one woven torus.

446 **ink-dot-current** [S32] [S28] [S31]
Advect black dots through a slow current while larger pale particles drift against it.

447 **sand-letter-rebuild** [S32] [S28] [S31]
Blow a sand word sideways and use a reverse gust to gather it into a second word.

448 **spark-braid-stream** [S32] [S28] [S31]
Twist three spark streams into a braid, then separate them around a central symbol.

449 **snowglobe-object** [S32] [S28] [S31]
Shake a clear orb containing a product and let its snow settle into a circular base.

450 **bubble-star-map** [S32] [S28] [S31]
Inflate rising bubbles that pause at different depths to form a spatial constellation.

451 **petal-wake-trail** [S32] [S28] [S31]
Move a small sphere through darkness and emit paper petals only along its wake.

452 **pixel-swarm-portrait** [S32] [S28] [S31]
Attract square particles from the frame edges to assemble a coarse portrait in depth.

453 **comet-tail-lattice** [S32] [S28] [S31]
Drag one bright particle through a grid and bend nearby points into a long comet tail.

454 **waterdrop-necklace** [S32] [S28] [S31]
Emit droplets along a curve, merge them into a liquid chain, then break the chain apart.

455 **confetti-tunnel-drift** [S32] [S28] [S31]
Fly through a slow tunnel of ribbon confetti with a clear calm space at its center.

456 **firefly-depth-window** [S32] [S28] [S31]
Pulse fireflies at staggered depths until their combined light reveals a hidden surface.

457 **crystal-flock-turn** [S32] [S28] [S31]
Guide small crystal shards through a coordinated bank that flashes one bright silhouette.

458 **gravity-shelf-pour** [S32] [S28] [S31]
Pour colored grains across stepped shelves so each level creates a different falling curtain.

459 **smoke-point-sculpt** [S32] [S28] [S31]
Use a noisy vector field to curl thousands of soft points into a hollow smoke sculpture.

460 **raindrop-umbrella-dome** [S32] [S28] [S31]
Bounce rain particles off an invisible dome to reveal its curved boundary in midair.

TECHNIQUE REFERENCES

[S32] TouchDesigner: Particle SOP
[S28] Three.js particle sprites example
[S31] Blender Manual: Geometry Nodes

Full resource URLs: pp. 33-38.

Shader & distortion

461-480 / 20 motion ideas

461 **heat-haze-type** [S38] [S35] [S36]
Move a narrow heat column behind sharp lettering so only the background bends around it.

462 **liquid-lens-cursor** [S38] [S35] [S36]
Drag a thick refractive lens across an image and let its trailing edge relax into ripples.

463 **ribbed-glass-pass** [S38] [S35] [S36]
Slide vertical glass ribs over a photograph, magnifying alternating strips as they pass.

464 **chromatic-shear-band** [S38] [S35] [S36]
Push a horizontal band through a poster, splitting its color channels only inside the band.

465 **sdf-island-reveal** [S38] [S35] [S36]
Merge soft circular islands into one expanding mask that gradually reveals a new image.

466 **scanline-depth-bend** [S38] [S35] [S36]
Bend horizontal scanlines around a hidden sphere to expose its volume without shading.

467 **moire-grid-twist** [S38] [S35] [S36]
Rotate two fine line grids at different speeds and pinch their interference around a center.

468 **feedback-silk-folds** [S38] [S35] [S36]
Feed displaced frames back into themselves to pull a color field into slow silky folds.

469 **threshold-puddle-wipe** [S38] [S35] [S36]
Grow noisy black puddles until they merge, then replace their interiors with a second scene.

470 **polar-poster-tunnel** [S38] [S35] [S36]
Wrap a poster into polar coordinates and animate it as a rotating tunnel of repeated artwork.

471 **voronoi-window-crack** [S38] [S35] [S36]
Expand irregular glass cells across an image and refract each cell in a different direction.

472 **rolling-shutter-wave** [S38] [S35] [S36]
Offset image rows in time so a moving object bends into a soft traveling wave.

473 **pixel-sorting-rain** [S38] [S35] [S36]
Stretch bright image regions into vertical trails that stop at a moving luminance threshold.

474 **halftone-depth-ripple** [S38] [S35] [S36]
Make halftone dots swell along a circular wave while the underlying portrait stays aligned.

475 **mirror-seam-crawl** [S38] [S35] [S36]
Move a zigzag mirror seam across footage so reflected fragments crawl along its edge.

476 **noise-contour-etch** [S38] [S35] [S36]
Animate a noise field through thin contour lines that etch and erase a topographic surface.

477 **fisheye-breathing-room** [S38] [S35] [S36]
Pulse lens curvature around a fixed central subject while the room expands at the edges.

478 **digital-cloth-warp** [S38] [S35] [S36]
Pin four image corners and ripple the interior like fabric caught by a passing breeze.

479 **prism-slice-shift** [S38] [S35] [S36]
Cut an image into diagonal prism slices and offset their refraction before realigning them.

480 **ink-edge-displacement** [S38] [S35] [S36]
Use an uneven ink boundary to pull image details outward just before they disappear.

TECHNIQUE REFERENCES

[S36] Codrops: WebGL Shader Techniques for Dynamic Image Transitions

Full resource URLs: pp. 33-38.

Gradients & light

481-500 / 20 motion ideas

481 **folded-light-ribbon** [S27] [S30] [S40]
Fold a luminous gradient ribbon through darkness so overlapping layers create brighter seams.

482 **sunset-slit-sweep** [S27] [S30] [S40]
Move a narrow amber light slit across a cool wall and stretch its falloff into a soft gradient.

483 **caustic-ring-orbit** [S27] [S30] [S40]
Orbit a transparent ring above a matte plane and let its moving caustic frame the title.

484 **velvet-gradient-breath** [S27] [S30] [S40]
Slowly expand a dark violet radial gradient until its pale center fills the frame, then recede.

485 **laser-fan-curtain** [S27] [S30] [S40]
Open a thin laser line into a fan of rays, then fold the fan into a single bright edge.

486 **prism-wall-crawl** [S27] [S30] [S40]
Rotate a glass wedge to send a long spectrum across textured plaster and raised lettering.

487 **softbox-surface-chase** [S27] [S30] [S40]
Slide a rectangular reflection over a curved surface to reveal changing curvature.

488 **volumetric-window-bars** [S27] [S30] [S40]
Move dusty light shafts from a tall window across a shallow scene of floating shapes.

489 **color-cloud-confluence** [S27] [S30] [S40]
Drift three blurred color clouds together until a clean white pocket opens between them.

490 **light-paint-spiral** [S27] [S30] [S40]
Draw a glowing spiral in space and fade older segments into a soft colored afterglow.

491 **eclipse-halo-reveal** [S27] [S30] [S40]
Move a dark disc in front of a bright sphere and reveal the title inside the resulting halo.

492 **fiber-optic-tide** [S27] [S30] [S40]
Sweep points of light across fiber strands so the bundle reads as a rolling luminous tide.

493 **mesh-light-lagoon** [S27] [S30] [S40]
Animate a mesh gradient beneath translucent shapes to create slow pools of shifting color.

494 **gobo-letter-shadow** [S27] [S30] [S40]
Rotate a perforated light mask so scattered shadows briefly align into one readable word.

495 **reflective-color-tunnel** [S27] [S30] [S40]
Travel through a chrome corridor whose reflections carry a moving gradient down its walls.

496 **light-leak-hinge** [S27] [S30] [S40]
Open a thin bright seam like a door and let the spilling light wash the frame with color.

497 **frosted-neon-smear** [S27] [S30] [S40]
Slide neon bars behind frosted glass so sharp edges dissolve into broad soft color bands.

498 **spotlight-orbit-pair** [S27] [S30] [S40]
Circle two colored spotlights around a neutral object and animate their overlap as a third hue.

499 **subsurface-amber-pulse** [S27] [S30] [S40]
Send a warm light pulse through a translucent volume, revealing thicker areas with a delay.

500 **dawn-floor-ramp** [S27] [S30] [S40]
Raise a broad light source from below the horizon so a dark floor becomes a peach gradient.

Editorial collage

501-520 / 20 motion ideas

501 **receipt-snake-story** [S37] [S39] [S38]
Unroll a long receipt through image cutouts, using its printed lines to connect the scenes.

502 **torn-window-portrait** [S37] [S39] [S38]
Peel irregular paper windows open around a portrait while captions occupy the exposed gaps.

503 **contact-sheet-wave** [S37] [S39] [S38]
Tilt rows of contact sheet frames in a traveling wave and enlarge one selected exposure.

504 **archive-folder-fan** [S37] [S39] [S38]
Fan labeled archive folders outward and let photographs slide from their open edges.

505 **halftone-mouth-cut** [S37] [S39] [S38]
Replace a speaker's mouth with oversized halftone fragments that jump on stressed words.

506 **postage-stamp-map** [S37] [S39] [S38]
Send postage stamp cutouts along a route, layering their cancellations into a moving map.

507 **magazine-spine-flip** [S37] [S39] [S38]
Flip a thick magazine from its spine while each page carries one oversized word and image.

508 **photocopy-ripple-stack** [S37] [S39] [S38]
Offset successive photocopy layers so a static cutout ripples like a loose paper sculpture.

509 **scissor-path-reveal** [S37] [S39] [S38]
Animate a scissors silhouette along a jagged path that separates two photographic scenes.

510 **tape-strip-carry** [S37] [S39] [S38]
Pull transparent tape across a page and lift selected image fragments with its sticky surface.

511 **newspaper-column-split** [S37] [S39] [S38]
Slide narrow newspaper columns apart to expose a color image hidden beneath the text.

512 **polaroid-depth-chain** [S37] [S39] [S38]
Pass through a chain of overlapping instant photos, each frame opening into the next scene.

513 **ransom-letter-parade** [S37] [S39] [S38]
March mismatched paper letters along a baseline, then snap them into an orderly headline.

514 **fabric-patch-collage** [S37] [S39] [S38]
Stitch photo patches onto a fabric field and tug the seams to animate each image separately.

515 **creased-poster-portrait** [S37] [S39] [S38]
Fold a poster along a portrait's features so each crease reveals another face beneath it.

516 **book-tab-reel** [S37] [S39] [S38]
Flip through protruding book tabs that expand into full frame editorial scenes.

517 **xray-paper-sandwich** [S37] [S39] [S38]
Slide a narrow transparent band across stacked paper to reveal hidden cutouts underneath.

518 **chalk-mark-overprint** [S37] [S39] [S38]
Draw rough chalk arrows over a clean photograph as offset ink blocks arrive behind it.

519 **carousel-scrapbook** [S37] [S39] [S38]
Rotate a shallow 3D carousel of scrapbook pages while scraps flutter at their pinned corners.

520 **cutout-shadow-delay** [S37] [S39] [S38]
Move a paper figure first and let its exaggerated shadow catch up with a soft elastic delay.

Social & launch loops

521-540 / 20 motion ideas

521 **countdown-flip-stack** [S29] [S37] [S35]
Flip stacked number cards downward until the launch date appears, then restack them to loop.

522 **feature-window-carousel** [S29] [S37] [S35]
Orbit three small feature windows around a fixed headline and enlarge each as it faces front.

523 **notification-bubble-pop** [S29] [S37] [S35]
Inflate a notification bubble until it becomes the background, then rebuild the tiny bubble.

524 **launch-button-spring** [S29] [S37] [S35]
Compress a large launch button and release its energy as concentric rounded panels.

525 **phone-screen-relay** [S29] [S37] [S35]
Pass one animated shape between three phone screens, matching its position at every handoff.

526 **calendar-date-orbit** [S29] [S37] [S35]
Circle a marked date with moving calendar tiles that repeatedly settle back into one grid.

527 **logo-loading-return** [S29] [S37] [S35]
Draw a loading ring that folds into the brand mark, then unfolds back into the ring.

528 **card-deck-boomerang** [S29] [S37] [S35]
Throw a fan of product cards offscreen and bring the same deck back as a single stacked card.

529 **sneak-peek-shutters** [S29] [S37] [S35]
Open narrow shutters for brief product glimpses before one full reveal closes into the start.

530 **quote-highlight-lap** [S29] [S37] [S35]
Run a bright highlight through a short quote and curl its final stroke back to the first word.

531 **profile-orbit-badges** [S29] [S37] [S35]
Orbit small topic badges around a profile disc, enlarging one badge per revolution.

532 **new-drop-elevator** [S29] [S37] [S35]
Raise a product card through a vertical slot while the previous card returns behind the wall.

533 **sale-tag-pendulum** [S29] [S37] [S35]
Swing a paper tag across the frame so each pass reveals a different product color.

534 **app-icon-metamorph** [S29] [S37] [S35]
Stretch an app icon into a feature scene, then compress the scene back into its rounded square.

535 **waitlist-ticket-roll** [S29] [S37] [S35]
Unspool numbered tickets that briefly reveal the launch message before curling into a roll.

536 **review-star-conveyor** [S29] [S37] [S35]
Carry review stars along a belt that bends around the main quote and returns behind it.

537 **poster-puzzle-loop** [S29] [S37] [S35]
Slide nine poster tiles through one empty space until the artwork resolves and scrambles again.

538 **story-ring-stage** [S29] [S37] [S35]
Expand a small story ring into a circular stage, show one product action, then shrink the stage.

539 **price-tab-swap** [S29] [S37] [S35]
Pull a bright price tab sideways so the product changes with the tab's moving edge.

540 **announcement-lid-loop** [S29] [S37] [S35]
Lift a flat lid to reveal a tiny animated announcement scene and close it on the same pose.

Transitions & cuts

541-560 / 20 motion ideas

541 **hinged-frame-cut** [S35] [S36] [S38]
Rotate an image plane on its central hinge and reveal the next scene on its reverse side.

542 **ink-reservoir-fill** [S35] [S36] [S38]
Fill the frame from below with thick ink whose rising surface exposes the next image.

543 **whip-pan-object-lock** [S35] [S36] [S38]
Whip past a foreground object and hold its silhouette in place as the background changes.

544 **zipper-scene-split** [S35] [S36] [S38]
Pull a zipper down the center of a scene and let the opening show a second shot beneath it.

545 **card-corner-dive** [S35] [S36] [S38]
Curl one image corner toward the lens and pass through its underside into the next scene.

546 **stair-step-shutter** [S35] [S36] [S38]
Close offset horizontal panels like stairs, then open them into a new scene from the far side.

547 **portal-ring-match** [S35] [S36] [S38]
Push through a circular object that becomes a matching ring in the following shot.

548 **cloth-swipe-cut** [S35] [S36] [S38]
Sweep a loose fabric sheet across the lens and reveal the next scene as the sheet falls away.

549 **lightning-seam-open** [S35] [S36] [S38]
Trace a bright jagged seam that splits the image into two drifting panels.

550 **shadow-fill-transition** [S35] [S36] [S38]
Grow a foreground shadow until it fills the frame, then reveal the next shot within it.

551 **liquid-drop-lens** [S35] [S36] [S38]
Let a large water drop cover the lens and flatten into a clear view of the next scene.

552 **spiral-stair-wipe** [S35] [S36] [S38]
Rotate wedge shaped masks around the center so the new scene arrives as a spiral staircase.

553 **match-cut-tilted-plane** [S35] [S36] [S38]
Tilt a flat card until its edge matches a building line, then cut into the live scene.

554 **blinds-depth-shuffle** [S35] [S36] [S38]
Rotate vertical image strips in depth and swap the image while their edges face the camera.

555 **focus-rack-scene-swap** [S35] [S36] [S38]
Blur a foreground detail into a full frame color wash and refocus onto the next scene.

556 **subway-window-cut** [S35] [S36] [S38]
Move a dark window frame across the lens so the scene changes between passing openings.

557 **crumple-ball-morph** [S35] [S36] [S38]
Crumple the current image into a paper ball and unfold it as the following image.

558 **scan-beam-scene-wipe** [S35] [S36] [S38]
Sweep a vertical scan beam across the frame, replacing the scene only behind its bright edge.

559 **ripple-ring-replace** [S35] [S36] [S38]
Propagate expanding rings that progressively replace the old image from the center outward.

560 **negative-space-door** [S35] [S36] [S38]
Bring two large shapes together until their shared gap becomes the entrance to the next shot.

Audio-reactive motion

561-580 / 20 motion ideas

561 **bass-diaphragm** [S33] [S34] [S27]
Map low frequency energy to a deep rubber membrane that bulges toward the lens on each kick.

562 **snare-ribbon-snap** [S33] [S34] [S27]
Drive sharp ribbon folds with snare transients while the ribbon drifts slowly between hits.

563 **hi-hat-spark-canopy** [S33] [S34] [S27]
Emit fine sparks from an overhead grid on high frequency peaks and let them fade while falling.

564 **vocal-formant-orbits** [S33] [S34] [S27]
Assign three vocal frequency bands to nested rings that widen and tilt with the voice.

565 **stereo-pendulum-pair** [S33] [S34] [S27]
Drive two hanging lights from left and right channel levels so the stereo image becomes visible.

566 **spectrum-petal-corolla** [S33] [S34] [S27]
Map frequency bins to petal lengths and slowly rotate the resulting audio flower in depth.

567 **kick-caustic-pool** [S33] [S34] [S27]
Pulse a shallow water surface with bass hits and let its caustics animate the title below.

568 **transient-ink-stamps** [S33] [S34] [S27]
Trigger irregular ink stamps at detected attacks and let older marks spread into paper grain.

569 **melody-contour-thread** [S33] [S34] [S27]
Use dominant pitch to draw a thin rising and falling thread across a slowly scrolling field.

570 **sub-bass-architecture** [S33] [S34] [S27]
Scale the height of heavy columns from a low band envelope while their bases remain fixed.

571 **cymbal-prism-dust** [S33] [S34] [S27]
Use high band energy to brighten floating prism dust without changing its slow trajectories.

572 **voice-syllable-tiles** [S33] [S34] [S27]
Flip one tile on each voice onset so a spoken phrase builds a textured image over time.

573 **spectrum-topographic-map** [S33] [S34] [S27]
Map frequency amplitude to stacked contour heights and let the landscape scroll with the track.

574 **beat-orbit-latch** [S33] [S34] [S27]
Advance orbiting blocks to their next docking positions on strong beat detections.

575 **audio-velvet-brush** [S33] [S34] [S27]
Use a smoothed amplitude envelope to sweep a light brush through a field of velvet fibers.

576 **stereo-liquid-balance** [S33] [S34] [S27]
Tilt a transparent liquid vessel according to the level difference between stereo channels.

577 **percussion-thread-loom** [S33] [S34] [S27]
Assign drum bands to different colored threads that weave forward only when their band fires.

578 **chorus-halo-expansion** [S33] [S34] [S27]
Drive a soft halo's radius from a long amplitude envelope so sustained passages open the space.

579 **frequency-window-city** [S33] [S34] [S27]
Light rows of building windows from separate frequency bands to form an animated audio city.

580 **waveform-copper-spring** [S33] [S34] [S27]
Deform a coiled copper wire with the audio waveform while preserving its overall circular path.

Spatial camera moves

581-600 / 20 motion ideas

581 **helix-gallery-ascent** [S40] [S39] [S31]
Move the camera up a helix of image panels, keeping the next panel centered at each quarter turn.

582 **macro-to-orbit-pullback** [S40] [S39] [S31]
Start inside one tiny surface detail and pull back into a wide orbit around the complete object.

583 **infinite-doorway-dolly** [S40] [S39] [S31]
Dolly through nested door frames whose proportions shift to reveal a different scene at each depth.

584 **orthographic-perspective-melt** [S40] [S39] [S31]
Blend an orthographic layout into a deep perspective view while the central object stays still.

585 **low-floor-skimming-pass** [S40] [S39] [S31]
Skim just above a reflective floor and rise at the end to reveal the object's full silhouette.

586 **crane-over-paper-city** [S40] [S39] [S31]
Crane over layered paper buildings and descend into a narrow street formed by their cut edges.

587 **camera-roll-horizon** [S40] [S39] [S31]
Roll around the viewing axis while a fixed central subject anchors a rotating architectural horizon.

588 **parallax-photo-canyon** [S40] [S39] [S31]
Travel between cutout photo planes arranged as a canyon, exposing hidden images at oblique angles.

589 **rail-through-type-counters** [S40] [S39] [S31]
Follow a smooth camera rail through the interior counters of large extruded letters.

590 **ceiling-orbit-inversion** [S40] [S39] [S31]
Orbit from a normal tabletop view to directly overhead until the ceiling becomes a graphic backdrop.

591 **foreground-pillar-slalom** [S40] [S39] [S31]
Slalom between oversized foreground pillars to reveal a centered object in short controlled glimpses.

592 **dolly-zoom-color-room** [S40] [S39] [S31]
Move backward while narrowing the field of view so a color room stretches behind a fixed subject.

593 **vertical-display-stack** [S40] [S39] [S31]
Rise past floating display shelves and pause briefly where their edges align into a flat composition.

594 **micro-world-surface-dive** [S40] [S39] [S31]
Dive toward a patterned surface until its texture resolves into a miniature geometric landscape.

595 **backward-tunnel-reveal** [S40] [S39] [S31]
Move backward through an abstract tunnel and reveal that its exit is a small product opening.

596 **corner-pivot-tracking** [S40] [S39] [S31]
Track a moving object, then pivot around a sharp corner while keeping its screen position stable.

597 **focus-plane-glide** [S40] [S39] [S31]
Glide sideways through shallow floating objects and move the focus plane across them in sequence.

598 **top-down-isometric-swing** [S40] [S39] [S31]
Swing from a strict top view into an isometric angle so a flat grid becomes a stepped sculpture.

599 **orbital-frame-alignment** [S40] [S39] [S31]
Orbit several scattered frames until their edges briefly align into one complete rectangle.

600 **spiral-inward-landing** [S40] [S39] [S31]
Descend along a tightening spiral around an object and stop on a clean front facing hero view.
